Pulsar Launches New Corporate Website

2026-09-01

This Announcement and the Information Contained Herein Is Restricted and Is Not for Release, Publication or Distribution, in Whole or in Part, Directly or Indirectly, in, Into or from Australia, Japan or the Republic of South Africa or to Be Transmitted, Distributed to, or Sent by, Any National or Resident or Citizen of Any Such Countries or Any Other Jurisdiction in Which Such Release, Publication or Distribution May Contravene Local Securities Laws or Regulations

LONDON, Sept. 01, 2026 (GLOBE NEWSWIRE) -- Pulsar Helium Inc. (AIM: PLSR, TSXV: PLSR, OTCQB: PSRHF) ("Pulsar" or the "Company"), a primary helium company, is pleased to announce the launch of its new website, providing a comprehensive digital hub for information on helium, the Company's project portfolio and the investment opportunity.

The new website has been designed to provide a central destination for investors, researchers, industry participants and the wider public to explore Pulsar's activities and access educational and informational resources relating to helium.

The website brings together the Company's corporate and investor information with a range of new content and features, including:

- ³He Hub: A dedicated information center covering the properties, applications and potential of helium-3 (³He), with details of Pulsar's ³He discovery at its Topaz Project, the Company's ³He Research Initiative, and a curated collection of external sources and research.
- Project Portfolio: Detailed information on Pulsar's portfolio of primary helium exploration projects, including the flagship Topaz Project in Minnesota and the Tunu Project in Greenland, alongside the Company's newer Falcon and Torino projects in the USA.
- Investor Hub: A comprehensive suite of investor resources, including Company news, financial statements, stock information, corporate presentations, governance, ESG, AGM materials and AIM Rule 26 information.
- Pulsar Community: Dedicated content showcasing the Company's community engagement initiatives.

The launch forms part of Pulsar's ongoing efforts to improve the accessibility of information, engage and educate new demographics about helium criticality and communicate the Company's activities and the wider importance of primary helium to a broader audience.

Thomas Abraham-James, CEO of Pulsar, commented:

"We are very pleased to launch our new website, which we have designed to be much more than a traditional corporate website. It is intended to be a central hub for all things helium, bringing together information about Pulsar, our project portfolio, the helium market and the science and applications behind this critically important element.

"The new website also reflects the evolution of Pulsar as we advance our portfolio of projects. Alongside our investor resources, we wanted to create a platform through which people can engage with our work, our communities and the wider helium story."

The new website is available at <https://pulsarhelium.com>

About Pulsar Helium Inc.

Pulsar Helium Inc. is a publicly traded company quoted on the AIM market of the London Stock Exchange (United Kingdom) and listed on the TSX Venture Exchange with the ticker PLSR (Canada), as well as on the OTCQB with the ticker PSRHF (United States of America). Pulsar's portfolio consists of its flagship Topaz helium project in Minnesota, the Falcon project in Michigan (both in the USA), and the Tunu helium project in Greenland. Pulsar is the first mover in both locations with primary helium occurrences not associated with the production of hydrocarbons identified at each.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward-Looking Statements

This news release contains forward-looking information within the meaning of Canadian securities legislation (collectively, "forward-looking statements") that relate to the Company's current expectations and views of future events. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "will likely result", "are expected to", "expects", "will continue", "is anticipated", "anticipates", "believes", "estimated", "intends", "plans", "forecast", "projection", "strategy", "objective" and "outlook") are not historical facts and may be forward-looking statements. Forward-looking statements may involve estimates and are based upon assumptions made by management of the Company, including, but not limited to, the Company's capital cost estimates, management's expectations regarding the availability of capital to fund the Company's future capital and operating requirements; the ability to obtain all requisite regulatory approvals; and that the State of Minnesota will complete the requisite rulemaking, environmental review, permitting requirements and implementation steps to allow for commercial production.

No reserves have been assigned in connection with the Company's property interests to date, given their early stage of development. The future value of the Company is therefore dependent on the success or otherwise of its

 Pulsar Helium Inc

activities, which are principally directed toward the future exploration, appraisal and development of its assets, and potential acquisition of property interests in the future. Un-risked Contingent and Prospective Helium Volumes have been defined at the Topaz Project. However, estimating helium volumes is subject to significant uncertainties associated with technical data and the interpretation of that data, future commodity prices, and development and operating costs. There can be no guarantee that the Company will successfully convert its helium volume to reserves and produce that estimated volume. Estimates may alter significantly or become more uncertain when new information becomes available due to for example, additional drilling or production tests over the life of field. As estimates change, development and production plans may also vary. Downward revision of helium volume estimates may adversely affect the Company's operational or financial performance.

Helium volume estimates are expressions of judgement based on knowledge, experience and industry practice. These estimates are imprecise and depend to some extent on interpretations, which may ultimately prove to be inaccurate and require adjustment or, even if valid when originally calculated, may alter significantly when new information or techniques become available. As further information becomes available through additional drilling and analysis the estimates are likely to change. Any adjustments to volume could affect the Company's exploration and development plans which may, in turn, affect the Company's performance. The process of estimating helium resources is complex and requires significant decisions and assumptions to be made in evaluating the reliability of available geological, geophysical, engineering, and economic data for each property. Different engineers may make different estimates of resources, cash flows, or other variables based on the same available data.

Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's control, which could cause actual results and events to differ materially from those that are disclosed in or implied by such forward-looking statements. Such risks and uncertainties include, but are not limited to, that Pulsar may be unsuccessful in drilling commercially productive wells; that Pulsar may be unsuccessful at negotiating the Definitive Agreement with the vendor; the risk that the equipment to be acquired pursuant to the Letter Agreement may not perform as anticipated or at all; the uncertainty of resource estimation; operational risks in conducting exploration, including that drill costs may be higher than estimates; commodity prices; health, safety and environmental factors; the risk that the requisite state rulemaking, environmental review, permitting and implementation steps will not be completed; and other factors set forth above as well as risk factors included in the Company's Annual Information Form dated February 3, 2026, for the year ended September 30, 2025, found under Company's profile on www.sedarplus.ca.

Forward-looking statements contained in this news release are as of the date of this news release, and the Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new

information, future events or otherwise, except as may be required by law. New factors emerge from time to time, and it is not possible for the Company to predict all of them or assess the impact of each such factor or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. No assurance can be given that the forward-looking statements herein will prove to be correct and, accordingly, investors should not place undue reliance on forward-looking statements. Any forward-looking statements contained in this news release are expressly qualified in their entirety by this cautionary statement.
